Subject: Agency prior approval of FMC class 1 post closure plan modification

Kelly – as we talked about today, I understand that FMC will send a copy of a letter requesting that the Agency approve changes to the Post Closure Plan for the Slag Pit Sump. You should receive that before the end of next week. If you do not receive it please let Jan Hastings know. If you have any concerns, comments, etc. with FMC's proposal please let us know as Jan will be working on this while I am out and would like to keep it moving. We have provided some assistance to FMC in helping them understand the RCRA rules related to modifications. The modification procedures are in 40 CFR 265.118 and the classification of modifications are found in 270.42. This should be described in FMC's letter. As I mentioned, just taking this project back after being away from it for several+ years I would like to catch-up with you and Susan on the Tribe's perspective of the events over the past 10 years. I will be back on 8/25 so if you have time on the 26th or 27th or the following week I would like to talk. Thanks!

Here is Jan's contact info:
Janis Hastings, Associate Director
Office of Air, Waste & Toxics
U.S. Environmental Protection Agency, Region 10
1200 Sixth Ave, Ste. 900
